REDESIGNING HOME-BASED LYMPHEDEMA TREATMENT TO IMPROVE COMPLIANCE

You empower your lymphedema patients to care for themselves at home. Yet patient compliance with self-care is low,¹ and they often find manual self-MLD too difficult.²

**There is a way to continue to care for your patients, even when you’re not there.** Flexitouch Plus comfortably automates self-MLD with 93% compliance³ for improved outcomes. Other proven benefits include:

- Significant reduction in edema versus self-MLD⁴
- Statistically significant improvement in Quality of Life³
- 79% reduction in cellulitis episodes.⁵
